

New Indel Webasto Marine website now online

Attractive tool designed to support dealer activities and allow fast access to information for manufacturers

St Agata, Italy. – April 12, 2011 - Indel Webasto Marine, specialist for quality refrigeration solutions in the Marine industry, has been accumulating a high reputation for its customizable fridge and freezer applications combined with outstanding design options. The new corporate website of Indel Webasto Marine focuses on clear structures for fast access to data and information as well as good usability. Matching the products' innovative design, the new corporate website comes in a completely new layout with bright colours and attractive pictures. Features include the Indel Webasto Marine Refrigerator, a software tool which allows customers to customize their cooling solution in six configuration steps, as well as user-friendly search functionality. The website is available in English (GB as well as US), French and Italian. Other language versions are planned for the future. For detailed product information please refer to the following link: www.indelwebastomarine.com or for the US to www.indelwebastomarineusa.com.

Easy navigation

Visitors can now choose from seven different product groups which are directly accessible from all subpages. Each product group has an overview page presenting all products and a subpage for detailed information such as product descriptions, technical details and datasheets available for download. In order to send a request for pricing a global dealer list can be found as well as a direct contact form.

Special features

A special highlight on the new website is the interactive Refrigerator tool which can be downloaded completely free of charge. The Refrigerator guides visitors through six configuration steps to create their personalized refrigerator. A broad range of door frames and openings, locking systems as well as handles are available to meet virtually every design demand.

Beside that the new website features a search functionality to make precise information quickly available. The latest news, press releases and a detailed show calendar are integrated into the navigation point "News and Events".

About Indel Webasto Marine:

At the beginning of 2008, Webasto formed a new alliance for more comfort on board. The traditional Bavarian company acquired 50 percent of the shares in the company Indel Marine – and together with Indel B, founded the joint venture Indel Webasto Marine. The joint venture partner is one of the leading manufacturers of 12 and 24 volt refrigerators. The newly established joint venture business, Indel Webasto Marine, is based in St Agata Feltria, 120 kilometers south of Bologna, where it also has its production facility. The headquarters of the American subsidiary is Fort Lauderdale in the US state of Florida.

The product portfolio of Indel Webasto Marine includes cooling and heating solutions. From small boats to superyachts – Indel Webasto Marine provides the right climate solution for every type of boat, thereby creating the perfect feel-good climate on board. The core competence of the company is customer-specific adaptations, which can be carried out in

individual orders or for the whole production series. The Isotherm refrigerators and Isotemp boilers, which are sold by Indel Webasto Marine, are especially well-known in the marine industry. More information on www.indelwebastomarine.com
